Professional Summary

Employments

Self-motivated and a team player with 8 years of post-PhD experience in computational biology research, resulting in several collaborations and more than 20 peer-reviewed research publications. Google Scholar h-index 11, i10-index 12. Complete list upon request.

	National Institutes of Health
Conducting machine learn	ning and statistical analysis of single-cell data on various platforms at the
Center for Human Immun	nology.
	sociate, Washington University in St. Louis
Taught undergraduate a	Aigginbottom University of Agri., Tech. & Sci
	Education
Ph.D. Biosciences, University	ity of Birmingham2011-2015
 M.Tech. Bioinformatics, See Awarded silver medal and a dissertation on statistic. B.Tech. Biotechnology, All Graduated with the 1st disconnection. 	ravel funding to attend several conferences around the globe. am Higginbottom Institute of Agri., Tech., Sci
Computational Biology	Flow/mass cytometry, SomaScan, and spatial transcriptomics data analysis, molecular structure prediction, molecular docking, molecular dynamics simulation, and sequence analysis.
Experimental Biology	PCR, Gibson assembly, restriction digestion, plasmid transformation, microbiology techniques, HPLC amongst others.
Programming Languages	Python, Perl, C++, R, LaTeX, HTML, CSS, and Java Script.
Data Science and ML Tools	Pandas, SciPy, NumPy, Matplotlib, Seaborn, Plotly, Scikit Learn, Keras, and TensorFlow.
Database & containers	SQLite, and Neo4J. Singularity, and Docker.
Operating Systems	Linux, MS Windows, and Mac OS X.
